

margin

Combines the margin-top, margin-right, margin-bottom, and margin-left properties into a single declaration.

Syntax:

margin: [top] [right] [bottom] [left];

Values:

A single value: Applies to all four sides.

Example: margin: 10px; (10px margin on all sides)

Two values: First value is for top & bottom, second is for left & right.

Example: margin: 10px 20px; (10px vertical, 20px horizontal).

Three values: First is top, second is left & right, third is bottom.

Example: margin: 10px 20px 30px;

Four values: Each value applies to top, right, bottom, and left in clockwise order.

Example: margin: 10px 20px 30px 40px;.

2. margin-top:

Sets the space above an element.

margin-top: 10px;

3. margin-right:

Sets the space to the right of an element.

margin-right: 15px;

4. Margin-bottom:

Sets the space below an element.

margin-bottom: 20px;

5. margin-left:

Sets the space to the left of an element.

margin-left: 25px;
